15 years of building and shipping software at scale — from startups to big-tech. Founded and led my own ventures from zero, assembled high-performing engineering teams, and delivered technical quality that directly drives business outcomes. Full-stack expertise in **React, Next.js, and TypeScript**, combined with hands-on experience deploying and building AI solutions.

Founder & Chief Technology Officer @ Ruslo

Jul 2025 – Present

Next.js • React • TypeScript • Node.js • AI/ML

AI knowledge management tool for teams.

- Own the product end to end: architecture, feature design, go-to-market, and user acquisition.
- Ship fast, learn from users, and iterate toward product-market fit.
- Took 2nd place as Product of the Week on Product Radar, the main Russian launchpad for early-stage startups.
- Reached **100+ users** and over **26,000 minutes** of transcribed audio.

Founding Engineer @ Skillset

Apr 2025 – Oct 2025

Next.js • React • TypeScript • Node.js • PostgreSQL • Redis • AWS • LangChain • OpenAI API • Tailwind

AI-powered HR recruitment platform.

- Built the platform from scratch as the sole engineer, covering AI agents, a complete CRM, and the full stack.
- Shipped in 6 months, working directly with the founders to define the product and prioritise the roadmap.
- Processed **10,000+ candidates** and onboarded **5 pilot customers** by launch.

Lead Frontend Developer @ Yandex

Dec 2023 – Apr 2025

Next.js • React • TypeScript • Vite • Node.js • AWS • CI/CD • Tailwind CSS • Playwright

Russia’s largest technology company and digital ecosystem.

- Built and led the frontend team from the ground up for Yandex Bandlink, a CRM for artists with multi-format landing page authoring.
- Owned the migration from an outdated Vite stack to Next.js, end to end: **100+ components in a year**.
- Kept the platform serving **8.6 million monthly visits** through the migration, with zero downtime.
- Proposed and built a Node.js visual regression tool (screenshot capture and comparison) that became part of the daily workflow.

Founding Engineer @ Osmo Studio

Jan 2023 – Jan 2025

Electron • React • TypeScript • Node.js • Microservices • AI integration

AI-powered motion graphics editor and film studio.

- Led the development and launch of a cross-platform desktop app with deep OS-level integrations.
- Designed and built backend microservices for authentication, data management, and AI integration.
- Led an outsourced development team and kept it aligned with project goals and on schedule.

Lead Frontend Developer @ Beamery

May 2022 – Dec 2023

React • TypeScript • Cypress • Design Systems • TypeScript Compiler API • JavaScript • a11y • i18n • Testing

AI platform for workforce transformation.

- Designed system architecture and developer experience for 10+ product teams as part of the Enablement team.
- Built complex design-system components with accessibility (a11y) and internationalisation (i18n) as first-class requirements.
- Made Cypress run only the tests for affected components, cutting test time by over 60% and saving billable CI time.
- Built a tool that generates documentation directly from TypeScript, keeping 50+ components in sync on every change.
- Optimised the CI/CD pipeline, cutting test time from **20 minutes to 3–5 minutes per commit**, with verified savings of **£25,000+** a year.
